

What we see...

Traditional root cause analysis tends to divert effort to 'Analysis', based on less than rigorous investigation, resulting in uncoordinated or ineffective preventive actions. The COMET process emphasizes the 'Discover' phase, resulting in systemic actions that prevent incident re-occurrence.

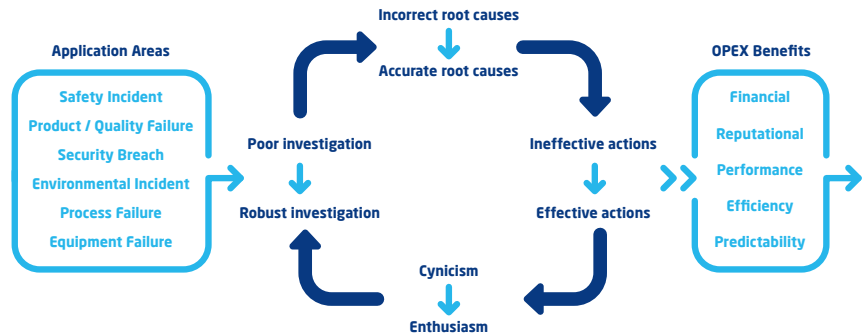

Unique COMET Process

Forensic focus on evidence gathering, typically 5x more than alternatives

Meaningful Actions based on factual evidence

Step change in Process Ownership

COMET LITE

Designed for Low Consequence Events

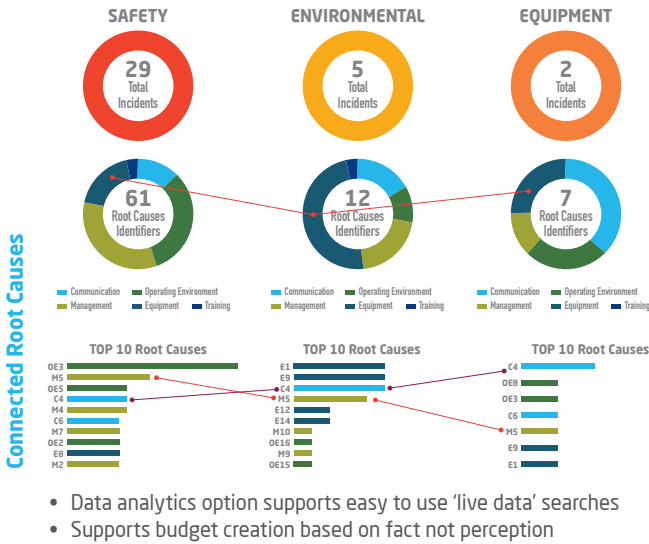

- A smart and consistent means of investigating and analyzing low consequence incidents
- Utilizes the same set of Root Causes, supporting consistent analysis
- Avoids incident backlogs or incident ignorance
- Suitable for incidents which in themselves would not attract regulatory or executive interest
- Facilitates consistent understanding and trending of 'low consequence' incidents
- Resource and time efficient - Single investigator, typically < 1 hour

Differentiators Between Comet And The Rest...

- OPEX benefits that add considerable business value
- Forensic focus on evidence gathering
- COMET lite typically '1-hour investigations' of low risk / consequence incidents
- Big Data unlocked: enables a step-change in incident reduction
- Genuinely user driven - current developments include AI tools & accredited Human Factors analytics
- Bespoke company integration and training package
- Most cost efficient solution on the market
- Able to interface with most EHS Software Platforms

BIG DATA UNLOCKED

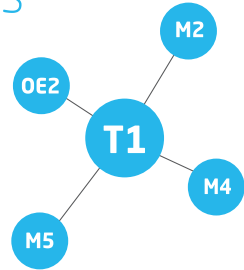

Eliminating Repeat Incidents

Understanding Systemic Root Cause Relationships

20/80

TARGETING 20% OF THE PROBLEMS THAT CAUSE YOU 80% OF THE PAIN!

- Imagine a process that facilitates resolving 20% of the systemic actions that address 80% of the root causes
- In many cases when a root cause is identified there is a relationship with groups of root causes. This means that one carefully crafted action can resolve several root causes

Proven Integration with all Major Safety Management Systems

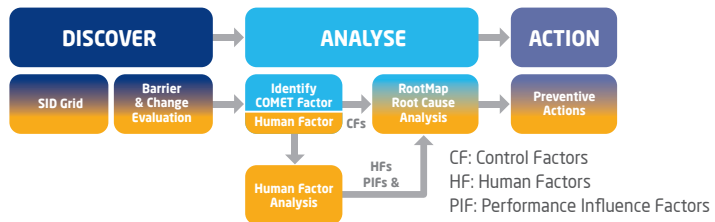

Making It Yours

Tools to integrate COMET into your business...

- Roll-Out using client organization branding
- Includes the provision of a best practice COMET Incident Management Standard that considers and integrates Client specific processes
- Includes 12 months of Poster Campaigns to support implementation
- This offers Ownership benefits for the Organization
